Program no:22

Aim: Implement a program to scrap the web page of any popular website (scrapy)

Program:

```
import scrapy
class Quotesspider(scrapy.Spider):
    name='quotes'

    def start_requests(selfself):
        url=['http://quotes.toscrap.com/page/1/'
             'http://quotes.toscrap.com/page/2/']
        #for url in urls:
        #yield scrapy.Request(url=url,callback=self.parse)

    def parse(self, response):
        page=response.url.split("/")[-2]
        filename='quotes-%s.html'% page

        with open(filename,'wb') as f:
            f.write(response.body)
            self.log('saved files'% filename)
```
